Mid-Western HR Drill

Used Worldwide in Many Applications

- Powerful hydraulic rotary drill capable of drilling in any condition
- Versatile design allows our mast to be attached to fit just about any piece of equipment with an auxiliary hookup
- Available in gas or diesel models
- Offered in many styles, including our HRT unit that comes complete with full trailer - perfect for carrying all tools and accessories
- Available as our compact HRM unit mounted to a mini skid - perfect for small footprint jobs like geothermal heating/cooling installations and water wells
- Affordable price points make them a great fit for any job

Hydraulic Rotary Drill Specifications

Down Force	8,800 ft. lbs.
Pullback	11,000 ft. lbs.
Rotary RPM	35 to 88
Rotary Torque	1,558 ft. lbs.
Stroke	72 in.
Hydraulic Pressure	3,000 psi
Hydraulic Flow	12 to 18 gpm
Starter	12 volt electric

Backed by over 65 years of USA manufacturing experience!
